

**AUGUST 2007**

**MAINTAINING AND CLEANING VINYL PRODUCTS**

Vinyl and rubber products are maintained by wiping with water and a non-abrasive cloth. If further cleaning measures are required, a mild soap can be added to the water or an acrylic wax may be used to improve the gloss finish. The use of chemicals and/or abrasive scrubbing tools may cause scratching or otherwise damage the product.

If you should require further information please contact us at 1-800-265-2977. Our Customer Service Representatives are available to answer any addition questions.
